CLASS – VI CASE STUDY SESSION – 2022-23

GEOGRAPHY- CHAPTER- 1- THE EARTH IN THE SOLAR SYSTEM

We are living on the Earth and the Earth is a part of the Solar System. Our Solar System is a part of the Milky Way Galaxy which is a part of the Universe. The term Solar System came from the Roman mythology is the Sun god related to the Sun and its family.

1. What is the Solar System?
2. What is the Milky Way Galaxy?
3. That is the Universe?
4. How is the Earth a part of the Milky Way Galaxy and the Universe?

CHAPTER -2- GLOBE: LATITUDES AND LONGITUDES

It is difficult to find out the location and its description of a place on the Earth. We can locate a place of the Earth or globe very easily if we know its latitude and longitude. By the help of the Grid network of these latitudes and longitudes where they intersect each other we can identify a place with the degrees lying in different hemispheres.

1. What are latitudes and longitudes?
2. What is the Grid Network?
3. How can we identify and locate a place of the Earth?
4. What are hemispheres?
