

CASE STUDY

Read the following unseen passage and choose the correct answers.

Bears are found in Europe, Asia, Africa, and America. They are massively built, with short tails and thick legs. Bears are not really carnivores. They eat almost anything, the chief exception in the polar bear, which in its natural state lives on fish and seals. However, in captivity, they seem to enjoy meat, vegetables, fruits, milk, rice, and porridge.

Bears are not quite as dangerous as people imagine them it is like most animals; they will do their best to avoid human beings. They have a special sense that is eyesight to see things.

I. We couldn't find a bear in

- A. America
- B. Africa
- C. Arctica
- D. Asia
